Art Unit: 3672

The Petition to make Special has been granted 16 June 2004. This application is accorded special status entitling the applicant to examination out of turn and an interference search.

An interference search was completed 22 April 2004. No interfering application was discovered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hall (4103739).

Hall discloses hollow piston 30, barrel 40 allowing the piston to slide within, head 22 threaded to the piston, dump port 38, means 46 for slidably retaining the piston within the barrel, wherein the piston is capable of limited upward (by shoulder 42) and downward movement (by the bottom of head 22) within the barrel such that when the piston is fully upward (fig. 3) the dump port 38 is in communication with the barrel exterior or dumping position and when the piston is fully downward (fig. 2) the dump port is closed.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7, 10, and 11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 8, 10, and 12 of U.S. Patent No. 6666270. Although the conflicting claims are not identical, they are not patentably distinct from each other because a dump port (application) is considered the functional equivalent of a venting port (patent).

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to name the application structure 5 a venting port, as disclosed in the patent, in order to release fluid.

These claims, 1-7, 10, and 11, were not submitted in the parent application and were not of record when the restriction in 10/374567 was made. Thus, this double patenting rejection is proper since the non-elected claims in 10/374567 are not rejected under double patenting.

Art Unit: 3672

Allowable Subject Matter

Claims 13-15 are allowed.

Claims 8, 9, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
